MOM for 11 the week

There are some clarifications provided which were asked personally.

How the learning actually goes:

1) Initial assessment to the course.

2) if (completely passed):
     Next course initial assessment
else if(failed one of the module):
     Learning material of that module.

3) After learning → give practice level 1

if (passed):
      next practice level
else if(failed the practice test):
      stay in the same practice test and give the exam again.
4) If all teh practice levels are done, go to the initial assesment of next course.

Practices tests → parent="Module" and group by subskill

Initial assessment → parent="Course" and group by Module.
